

IMPORTANT CANDLE TIPS

"CLIP YOUR WICK"

A properly clipped wick results in:

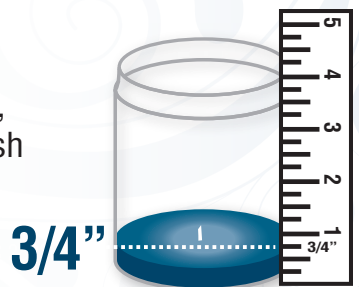

- 🔥 A longer, cleaner burning candle
- 🔥 Less soot and smoke while burning your candle
- 🔥 Your candle burning cleaner down the glass jar
- 🔥 A smaller flame & a safer candle

CANDLE BURNING INSTRUCTIONS:

NEVER LEAVE A BURNING CANDLE UNATTENDED

- Keep burning candles out of reach of children & pets. Do not burn around birds.
- Trim candle wick to 1/8" before lighting & keep your wick trimmed to 1/8" while burning.
- Always burn candle on a heat resistant surface, preferably on a heat & fire resistant candle holder. We recommend using the candle lid as a candle holder.
- Make sure candle wick is centered and the flame never touches the glass.
- Burn candle within sight, never on or near anything that can catch fire. For best results, burn candle 3-4 hours and extinguish.
- Do not let matches, wick trimmings or debris accumulate in the jar, as this could be a fire hazard.
- If flame smokes, extinguish & trim wick to 1/8" before relighting.
- To extinguish flame, place the metal lid over the jar, as this will minimize smoking.
- Burn candle until 3/4" of wax remains & discard, as glass may shatter. Our candles can extinguish with 3/4" of wax remaining. You will still achieve your 70 hour burn time while enjoying this unique safety feature.

Discarding your candle with 3/4" wax left at the bottom is safer and still gives you approximately 70 hours of enjoyment!
